Manufacturer Provided Description

The 54 Offshore: where big-boat fishing capabilities meet high-level creature comforts, all delivered with the style, stepped-hull performance, efficiency and quality construction so unique to Yellowfin. Available with quad outboard power, double row seating, a massive helm area with excellent visibility, room for three 24-inch displays and more, the 54 provides the same supreme level of performance that has made Yellowfin the standard by which all other center consoles are measured. A spacious cabin area beneath the console features a queen berth, fully-equipped galley, wraparound seating and a head.

Hardcore fishing features include an 800 quart fish box in the cockpit sole and 150 gallons of livewell capacity. A diesel generator comes standard, and major options include a bow thruster, a Quick dynamic stabilizer and numerous hardtop/tower possibilities.
